DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted. The inventions to be elected are presented below:

- i. Group I, claim(s) 1-23, drawn to a method for detecting, separating and identifying an expressed trace protein and/or peptide in a test sample.
 - ii. Group II, claim(s) 24-25, drawn to a device.
2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features. The technical features linking Groups I and II are embodiments that perform HPLC, fluorescence detection and collect fractions of samples. Notably, although Group II requires a "microcolumn HPLC" and a "microfluorescence detector," Group I neither requires a separate HPLC and fluorescence detector nor "micro" HPLC and fluorescence detection. Accordingly, a prior art reference teaching any means of performing HPLC and fluorescence detection,

including a single means, would teach this common technical feature between Groups I and II. Indeed, Schrattenholz (US 2003/0036101) teaches a fraction collector and an HPLC arrangement having a fluorescence detector and enzyme-coupled columns. See page 5, paragraph 0063. Accordingly, the technical features linking Groups I and II are not special technical features over the prior art. Correspondingly, Groups I and II lack unity of invention.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Leon Y. Lum whose telephone number is (571) 272-2872. The examiner can normally be reached on Monday to Friday (8:30 am to 5:00 pm).
